 Shipping Weight 80 Pounds

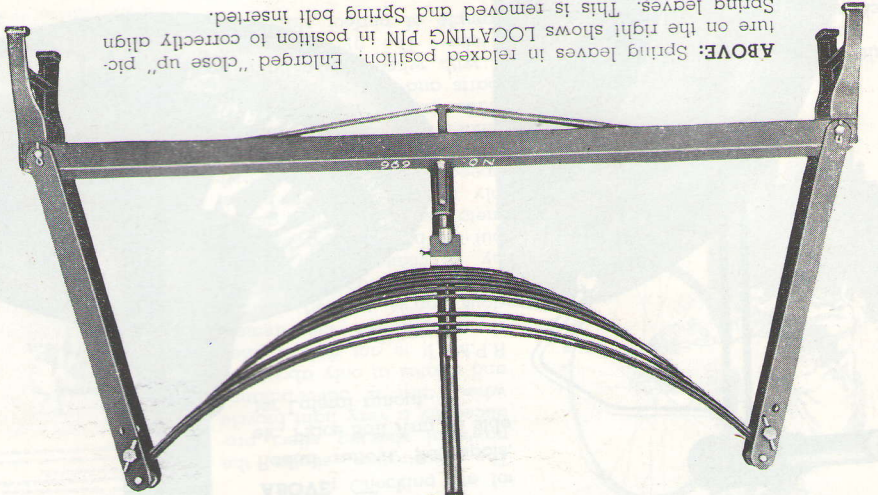

**No. 696  
 Price \$13.50**

This KRW Hydraulic Press was primarily designed for quick and easy installation of metal spring covers. It has also been found very valuable for assembling springs. Considering ease of operation, time saved and low cost, we think it is a very profitable investment for any Dealer or Service Station. **SELL SPRING COVERS** and "more riding comfort" to your 1938 customers and let Profits pay for it quickly.

**ABOVE:** This picture shows necessity of a Press. Spring covers cannot be properly installed in this curved or "relaxed" position. **No. 5307A Sh. Wt. 3 Lbs. Price \$ .75** SPECIAL 60° BLUNT CHISEL, designed to open the seams on spring covers without damage.

**ABOVE:** A few strokes of this specially designed Hydraulic Jack raises the Spring to a "flat" position so that spring covers can be easily, neatly and correctly installed.

**ABOVE:** Spring leaves in relaxed position. Enlarged "close up" picture on the right shows LOCATING PIN in position to correctly align Spring leaves. This is removed and Spring bolt inserted.
